

# A Rail Manifesto for London Elections 2024

London’s public transport is an essential component of a vibrant, efficient and effective city. It allows everyone to move around easily and quickly and, together with active travel, it reduces car use, with the associated issues of pollution, inefficient use of road space and cost to the user.

We call for 10 tasks to deliver better transport for London:

- |   |  |
|---|--|
| <p><b>1</b> A unified rail system under the direction of its Mayor</p>  | <p><b>2</b> Four trains per hour minimum service</p>   |
| <p><b>3</b> Discrepancies in service quality north and south of the Thames resolved</p>                         | <p><b>4</b> A system that is better maintained, with newer trains</p>  |
| <p><b>5</b> Fares that are fair for everyone (not just digitally savvy users with bank cards)</p>               | <p><b>6</b> Ticketing that is simple and user friendly (maintain Travelcards &amp; Oyster and link Railcards to bankcards)</p>   |
| <p><b>7</b> A system that is free of ‘access discrimination’</p>  | <p><b>8</b> Stations with adequate facilities and staff, that are safe!</p>  |
| <p><b>9</b> Planned improvements actioned (West London orbital, Bakerloo line extension, DLR to Thamesmead)</p> | <p><b>10</b> Longer term infrastructure projects initiated (Elizabeth Line and Croydon tram extensions, Crossrail 2 &amp; 3)</p> |
