Fares collated by *Railfuture* . Discounts can be obtained by using a railcard. Season tickets between one week and one year give unlimited travel between two stations at a substantial discount.

Notes:

- 1 Journeys in the opposite direction (i.e. where Cambridge is the destination not the origin) will usually have the same fares but there may be rare exceptions.
- 2 Fares increase the longer the journey but some adjacent stations have the same fare. The peak and off-peak fares do not always change at the same stations (e.g. Baldock to Hitchin).
- 3 Where a day return (cheaper) fare does not exist the one-month return is shown - marked as "1M".
- 4 Only Manea is and Clacton in the above list do not have an off-peak fare.
- 5 These walk-on fares are set by one operator. The operator that sets the fares isn't necessarily the one that runs the most trains (or indeed nay trains at all).
- 6 Passengers can save money on some 'Anytime Return' fares (i.e. where there is not 'Anytime Day Return' fare by splitting their tickets (e.g. at Thetford for morning peak time journeys to Norwich).
- 7 Long-distance journeys such as York, Leeds, Newcastle, Edinburgh are not shown since many people purchase heavily discounted 'Advance' tickets.

This document does not consider the fairness of fares but clearly it shows some examples where peak-time travel should be avoided unless absolutely necessary as the difference is large.
