Fares collated by *Railfuture*. Discounts can be obtained by using a railcard. Season tickets between one week and one year give unlimited travel between two stations, some at a substantial discount.

## Notes:

Fares shown are for adults in standard class. On Greater Anglia there may be an even cheaper super off-peak day return but this is not shown. Likewise, for Great Northern equivalents at the weekend and on bank holidays.

Journeys in the opposite direction (i.e. where Cambridge is the destination not the origin) will usually have the same fares but there may be rare exceptions.

Fares increase the longer the journey but some adjacent stations have the same fare. The peak and off-peak fares do not always change at the same stations (e.g. Baldock to Hitchin).

Where a day return (cheaper) fare does not exist the one-month return is shown - marked as "1M". Only Manea and Clacton in the above list do not have an off-peak fare.

These walk-on fares are set by one operator. The operator that sets the fares isn't necessarily the one that runs the most trains (or indeed any trains at all).

Passengers can save money on some 'Anytime Return' fares (i.e. where there is not 'Anytime Day Return' fare by splitting their tickets (e.g. at Thetford for morning peak time journeys to Norwich). Long-distance journeys such as York. Leeds, Newcastle, Edinburgh are not shown since many people purchase heavily discounted 'Advance' tickets.

This document does not consider the fairness of fares but clearly it shows some examples where peak-time travel should be avoided unless absolutely necessary as the difference is large.
